

TSS

has evolved

Introducing the
Corporate Rack

The Corporate Rack.

Build a smarter IT system.

Rittal takes the proven TS 8 modular concept for industrial enclosures further with the next-generation **Corporate Rack**. Its arrival signals a new opportunity to build flexible, cost-effective, secure solutions – fast!

Use only what you need from the range of coordinated profiles, system punchings, and uniform accessories to meet your exact specifications today, and then add or remove as you need over time.

This is **customisation** at its most productive to deliver a range of business benefits including:

- easier planning
- faster assembly
- reduced waste
- superior energy efficiency
- reduced maintenance
- enhanced investment protection.

The **Corporate Rack** modular system asserts itself as the de facto standard in technology packaging.

So the next time you build a data rack solution, take a closer look at the next-generation modular **Corporate Rack** system.

TS 8 has evolved, so the racks you build can too.

Design Features

- Robust welded frame structure
- Front and rear door fully vented; vented surface area > 82%
- Door hinge may be swapped to opposite side
- Cable entry via the roof and base
- Bayable at all levels
- Static load capacity of up to 1000 kg
- Castors and levelling feet on each model

Material:

Mild steel

Surface finish:

Enclosure frame:
Dipcoat – primed

Enclosure panels:
Dipcoat – primed, powder-coated
RAL 9005 (black)

Corporate Rack – With Side Panels

Supply includes: Enclosure frame TS 8 with mild steel doors front and rear, vented 82% open area, with 130° tooless quick release type hinges, rear door split type, top panel provisioned with 4 covered cable entry points, L-shaped front and rear depth-variable mounting angles each with screen printed RU positions and adjustable via tooless assembly, levelling feet, castor kit, comfort handles with security lock 3524 E with push button control, both sides have dual lockable side panels.

Please contact your local Rittal branch for the world's largest range of 19" and cable management accessories.

Don't forget Rittal's RiMatriX5 products that support this range with high density cooling and power solutions.

Natural Selection... The Corporate Rack

New Door Design

An 82% open area provides cool air to the servers with an intelligent design ensuring maximum airflow with no loss of mechanical strength.

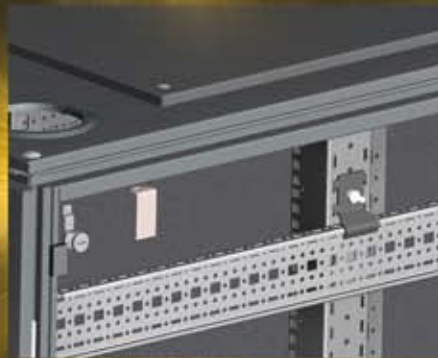

Dual Side Panels

Side panels are split to make it easier to move 1200mm and 1000mm deep panels. Being easier to handle means less damage and reduced installation costs.

Rear Double Door

Rear door with four point locking as standard. Split in two, it maximises the available corridor space.

Tool-less 19"

Making it quick and easy to move panel mounts saves engineers time on site to reduce the overall install costs.

High Density Cooling

TS 8 is upgradable to handle high density servers with up to 30kW in cooling capacity, deployed in modular configurations, LCP+, Extend and LCP modular fully compatible.

Electronic Upgrades

With standard electronic upgrades, TS 8 is one of the most secure and monitored enclosures on the market today. Easily retro-fitable, standard door has cable paths pre-installed.
